

# Project Proposal Regression

## **Abstract:**

Udemy help organizations of all types and sizes prepare for the path ahead wherever it leads. Our curated collection of business and technical courses help companies, governments, and nonprofits go further by placing learning at the center of their strategies.

## **Question/need:**

Try to predict the number of subscribers for a course?  
Try to predict free courses or paid courses ?

## **Data Description:**

I will scrap Udemy web <https://www.udemy.com>.  
Predict (free or paid courses, subscribers).

## **Tools:**

I will use python because it contains libraries for Web scraping tools (BeautifulSoup, Selenium,etc ). also for exploratory analysis and data cleaning will use (pandas, Matplotlib, NumPy ,etc.).
